

Sales Data Analysis

By Suman Das

Project Overview

Sales management has become crucial in today's competitive business landscape, where optimizing distribution methods is key to cutting costs and boosting profits. It's the main goal of any successful enterprise.

Welcome to the Amazon Sales Analysis Dashboard created in Microsoft Excel. This interactive dashboard provides a comprehensive overview of key metrics and insights derived from Sales Data.

Primary goal is to make sense of the connections between different aspects of sales data.

By visualizing data trends and patterns, this dashboard empowers decision-makers with practical insights, guiding them towards smarter strategies for business success.

KEY PERFORMANCE INDICATORS

1

Units Sold: 513K

2

Total Profit: 44M

3

Total Revenue: 137M

Unit Sold by Sales Channel

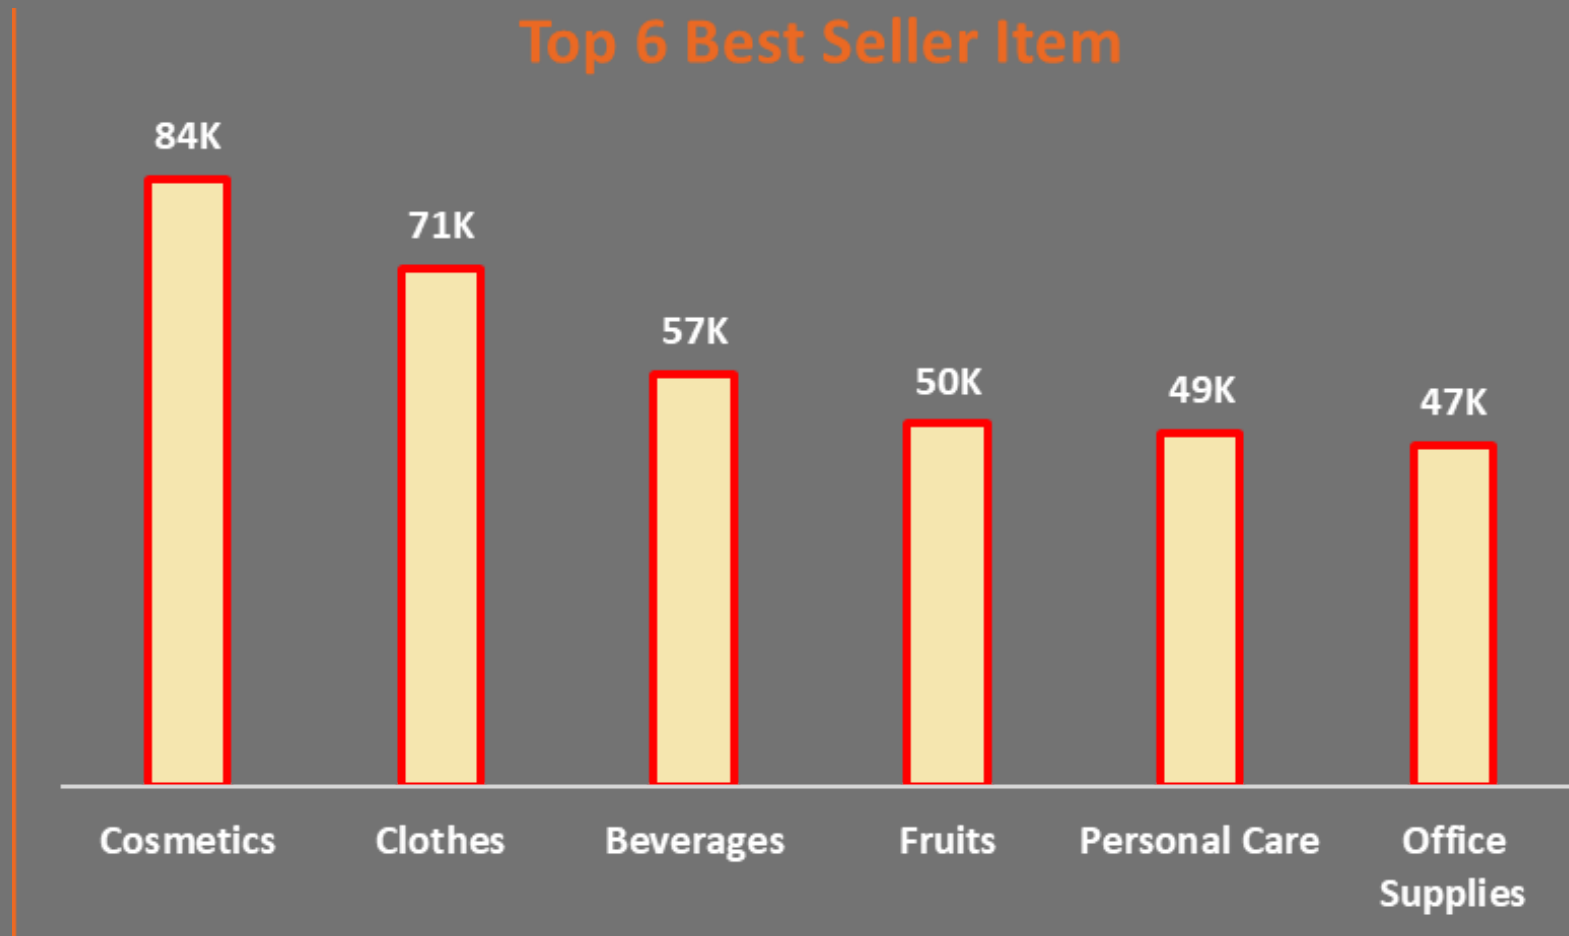

Sales Channel Analysis

Customers prefer to visit offline stores slightly more than to order from online websites.

Though, this is exception in Australia & Oceania Region and Middle East & North Africa Region

Sales Performance

Cosmetics, Clothes, Beverages, Fruits - these are top selling items over the years.

Most items are popular in Sub Saharan Africa and Europe Region

Profit Analysis

Most profit generated from Fourth Quarter i.e. October to December

More than 50% profit generated from Sub Saharan Africa and Europe Region. Asia comes third in this list.

Data-Driven Recommendation

Jackpot Quarter is Fourth Quarter (October, November, December).

Let's make some special deals with attractive promotions on Cosmetics, Clothes, Beverages, Fruits, so more customers can be targeted.

Also boost up offline stores by providing some kind of incentives, especially Sub Saharan Africa and Europe Region.
